

Elimination Rules — Non-core only

Each rule is explained first. Then every matching question is solved one-by-one using only that elimination rule.

Rules in this stream

# in stream	Playbook #	Title	Q count (this stream)
1	9	Non-core: option that abandons the asked operation	34

Non-core Rule 1 (Playbook #9) — Non-core: option that abandons the asked operation

Rule score (HOD): tech 7 · applicability 7 · FP-control 6 · edu 8 · reuse 7 · overall 7.0

Stream: Non-core · **Published questions:** 34 (25 CORRECT + 9 WEAK). INCORRECT mappings are excluded (see HOD audit).

What this rule means

Non-core traps often solve a different operation (CI vs SI, active vs passive, wrong % base).

Trigger

Quant/English/reasoning where one option changes the asked operation.

Do NOT Use

Do NOT use on technical Civil/EE items.

False positives

Any Non-core stem.

Confidence

Medium–High when operation words differ across options.

Application steps

1. Re-state the exact ask in one sentence.
2. Strike options that change the operation.

Memory cue: Match the asked operation exactly

Core elimination move

Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Q1 of 34 · Civil FLT-01 · data/civil/ce-flt01.js#Q72 · Key B · CORRECT

Subject: Quantitative Aptitude

Stem: A transmission-estimate package rises from ₹8.0 crore to ₹9.2 crore after a design revision. The percentage increase is:

- A. 12%
- B. 15%
- C. 18%
- D. 20%

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 12%

→ STRIKE — 12%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

B) 15%

→ KEEP — 15% This uniquely selects "15%". See per-option mechanisms under TRAP ANALYSIS.

C) 18%

→ STRIKE — 18%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

D) 20%

→ STRIKE — 20%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: 15% Final keyed result: 15%.

Q2 of 34 · Civil FLT-01 · data/civil/ce-flt01.js#Q76 · Key B · CORRECT

Subject: Quantitative Aptitude

Stem: A mobilisation advance of ₹5,00,000 is charged simple interest at 12% per annum for 8 months. The interest amount is:

- A. ₹30,000
- B. ₹40,000
- C. ₹48,000
- D. ₹50,000

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) ₹30,000

→ STRIKE — ₹30,000: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹40,000").

B) ₹40,000

→ KEEP — ₹40,000 This uniquely selects "₹40,000". See per-option mechanisms under TRAP ANALYSIS.

C) ₹48,000

→ STRIKE — ₹48,000: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹40,000").

D) ₹50,000

→ STRIKE — ₹50,000: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹40,000").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: ₹40,000 Final keyed result: ₹40,000.

Q3 of 34 · Civil FLT-01 · data/civil/ce-flt01.js#Q92 · Key A · CORRECT

Subject: English Language & Comprehension

Stem: Choose the correct passive form of: "The engineer verified the relay settings."

- A. The relay settings were verified by the engineer.
- B. The relay settings verified the engineer.
- C. The relay settings are verify by the engineer.
- D. The engineer was verified by the relay settings.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) The relay settings were verified by the engineer.

→ KEEP — The relay settings were verified by the engineer.

B) The relay settings verified the engineer.

→ STRIKE — The relay settings verified the engineer.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").

C) The relay settings are verify by the engineer.

→ STRIKE — The relay settings are verify by the engineer.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").

D) The engineer was verified by the relay settings.

→ STRIKE — The engineer was verified by the relay settings.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").

Survivors after this rule: A only → keyed A.

Q4 of 34 · Civil FLT-02 · data/civil/ce-flt02.js#Q78 · Key B · CORRECT

Subject: Quantitative Aptitude

Stem: A square's diagonal is increased by 10% while shape remains square. By what percentage does area increase?

- A. 20%
- B. 21%
- C. 10%
- D. 22%

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 20%

→ STRIKE — 20%: Picks '10%' by mis-applying the stem data — recheck units and the asked quantity.

B) 21%

→ KEEP — N/A — conceptual / judgement (no arithmetic key).

C) 10%

→ STRIKE — 10%: Picks '20%' by mis-applying the stem data — recheck units and the asked quantity.

D) 22%

→ STRIKE — 22%: Picks '22%' by mis-applying the stem data — recheck units and the asked quantity.

Survivors after this rule: B only → keyed B.

Q5 of 34 · Electrical FLT-01 · data/electrical/ee-flt01.js#Q72 · Key B · CORRECT

Subject: Quantitative Aptitude

Stem: A transmission-estimate package rises from ₹8.0 crore to ₹9.2 crore after a design revision. The percentage increase is:

- A. 12%
- B. 15%
- C. 18%
- D. 20%

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 12%

→ STRIKE — 12%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

B) 15%

→ KEEP — 15% This uniquely selects "15%". See per-option mechanisms under TRAP ANALYSIS.

C) 18%

→ STRIKE — 18%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

D) 20%

→ STRIKE — 20%: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "15%").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: 15% Final keyed result: 15%.

Q6 of 34 · Electrical FLT-01 · data/electrical/ee-flt01.js#Q76 · Key B · CORRECT

Subject: Quantitative Aptitude

Stem: A mobilisation advance of ₹5,00,000 is charged simple interest at 12% per annum for 8 months. The interest amount is:

- A. ₹30,000
- B. ₹40,000
- C. ₹48,000

→ STRIKE — ₹50,000: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹40,000").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: ₹40,000 Final keyed result: ₹40,000.

Q7 of 34 · Electrical FLT-01 · data/electrical/ee-flt01.js#Q92 · Key A · CORRECT

Subject: English Language & Comprehension

Stem: Choose the correct passive form of: "The engineer verified the relay settings."

- A. The relay settings were verified by the engineer.
- B. The relay settings verified the engineer.
- C. The relay settings are verify by the engineer.
- D. The engineer was verified by the relay settings.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

- A) The relay settings were verified by the engineer.
 - KEEP — The relay settings were verified by the engineer.
 - B) The relay settings verified the engineer.
 - STRIKE — The relay settings verified the engineer.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").
 - C) The relay settings are verify by the engineer.
 - STRIKE — The relay settings are verify by the engineer.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").
 - D) The engineer was verified by the relay settings.
 - STRIKE — The engineer was verified by the relay settings.: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "The relay settings were verified by the engineer.").
- Survivors after this rule: A only → keyed A.

Q8 of 34 · Electrical FLT-02 · data/electrical/ee-flt02.js#Q77 · Key D · CORRECT

Subject: Quantitative Aptitude

Stem: Contractor buys equipment for Rs 240000 and sells for Rs 276000. Profit percent on cost is:

- A. 20%
- B. 16%
- C. 12%
- D. 15%

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 20%

→ STRIKE — 20%: On SP base different.

B) 16%

→ STRIKE — 16%: Uses 276/240 wrong.

C) 12%

→ STRIKE — Solves a different operation than the one asked (e.g. CI vs SI, active vs passive, wrong % base).

D) 15%

→ KEEP — $36000/240000=15\%$.

Survivors after this rule: D only → keyed D.

=== SCRATCH CHECK (verification only — not the elimination) ===

15%. Final keyed result: 15%.

Q9 of 34 · Electrical FLT-02 · data/electrical/ee-flt02.js#Q92 · Key C · CORRECT

Subject: English Language & Comprehension

Stem: Choose passive: The technician calibrated the protection relay.:

- A. The protection relay is calibrate by the technician.
- B. The technician was calibrated by the protection relay.
- C. The protection relay was calibrated by the technician.
- D. The protection relay calibrates the technician.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

- A) The protection relay is calibrate by the technician.
 - STRIKE — The protection relay is calibrate by the technician.: Active reversed wrong.
- B) The technician was calibrated by the protection relay.
 - STRIKE — The technician was calibrated by the protection relay.: Wrong verb form.
- C) The protection relay was calibrated by the technician.
 - KEEP — Object becomes subject; past passive.
- D) The protection relay calibrates the technician.
 - STRIKE — The protection relay calibrates the technician.: Absurd agent.

Survivors after this rule: C only → keyed C.

Q10 of 34 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q2 · Key B · CORRECT

Subject: Aptitude and Reasoning

Stem: In a seating-arrangement puzzle during service-load verification, simple interest on ₹10,000 at 10% per annum for 2 years is:

- A. 1000
- B. 2000
- C. 2200
- D. 2100

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 1000

→ STRIKE — 1000: it does not follow from the stated system, sign convention, or requested check.

B) 2000

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

C) 2200

→ STRIKE — 2200: it does not follow from the stated system, sign convention, or requested check.

D) 2100

→ STRIKE — 2100: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: B only → keyed B.

Q11 of 34 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q20 · Key D · CORRECT

Subject: Aptitude and Reasoning

Stem: In a data-interpretation question during prototype evaluation, a deposit of ₹10,000 earns simple interest at 10% per annum for two years. Which statement is correct?

- A. ₹1,000
- B. ₹2,100
- C. ₹2,200
- D. ₹2,000

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) ₹1,000

→ STRIKE — ₹1,000: it does not follow from the stated system, sign convention, or requested check.

B) ₹2,100

→ STRIKE — ₹2,100: it does not follow from the stated system, sign convention, or requested check.

C) ₹2,200

→ STRIKE — ₹2,200: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

D) ₹2,000

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

Q20 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q13 · Key A · CORRECT

Subject: General English and Computers

Stem: In a computer-networking basic during capacity uprating, the sentence 'the engineer completed the report' is converted to passive voice. Which statement is correct?

- A. The report was completed by the engineer.
- B. The report is completed by the engineer.
- C. The engineer was completed by the report.
- D. The report had completed the engineer.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

- A) The report was completed by the engineer.
 - KEEP — The requested quantity follows from the data and condition stated in the stem.
- B) The report is completed by the engineer.
 - STRIKE — The report is completed by the engineer.: it does not follow from the stated system, sign convention, or requested check.
- C) The engineer was completed by the report.
 - STRIKE — The engineer was completed by the report.: it does not follow from the stated system, sign convention, or requested check.
- D) The report had completed the engineer.
 - STRIKE — The report had completed the engineer.: it does not follow from the stated system, sign convention, or requested check. REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: A only → keyed A.

Q21 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q22 · Key B · CORRECT

Subject: General English and Computers

Stem: In a grammar usage question during independent design check, the sentence 'the engineer completed the report' is converted to passive voice. Which statement is correct?

- A. The report is completed by the engineer.
- B. The report was completed by the engineer.
- C. The engineer was completed by the report.
- D. The report had completed the engineer.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) The report is completed by the engineer.

→ STRIKE — The report is completed by the engineer.: it does not follow from the stated system, sign convention, or requested check.

B) The report was completed by the engineer.

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

C) The engineer was completed by the report.

→ STRIKE — The engineer was completed by the report.: it does not follow from the stated system, sign convention, or requested check.

D) The report had completed the engineer.

→ STRIKE — The report had completed the engineer.: it does not follow from the stated system, sign convention, or requested check. REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: B only → keyed B.

Q22 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q31 · Key C · CORRECT

Subject: General English and Computers

Stem: In a constitutional-awareness item during post-installation testing, the sentence 'the engineer completed the report' is converted to passive voice. Which statement is correct?

- A. The report is completed by the engineer.
- B. The engineer was completed by the report.
- C. The report was completed by the engineer.
- D. The report had completed the engineer.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) The report is completed by the engineer.

→ STRIKE — The report is completed by the engineer.: it does not follow from the stated system, sign convention, or requested check.

B) The engineer was completed by the report.

→ STRIKE — The engineer was completed by the report.: it does not follow from the stated system, sign convention, or requested check.

C) The report was completed by the engineer.

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

D) The report had completed the engineer.

→ STRIKE — The report had completed the engineer.: it does not follow from the stated system, sign convention, or requested check. REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: C only → keyed C.

Q23 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q4 · Key D · CORRECT

Subject: General English and Computers

Stem: In a reading-comprehension item during commissioning acceptance, choose correct passive: 'They are repairing the line.':

- A. The line repaired
- B. The line was repair
- C. The line is repair
- D. The line is being repaired

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) The line repaired

→ STRIKE — The line repaired: it does not follow from the stated system, sign convention, or requested check.

B) The line was repair

→ STRIKE — The line was repair: it does not follow from the stated system, sign convention, or requested check.

C) The line is repair

→ STRIKE — The line is repair: it does not follow from the stated system, sign convention, or requested check.

REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

D) The line is being repaired

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

Survivors after this rule: D only → keyed D.

Q24 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q40 · Key D · CORRECT

Subject: General English and Computers

Stem: In a digital-literacy question during environmental-condition check, the sentence 'the engineer completed the report' is converted to passive voice. Which statement is correct?

- A. The report is completed by the engineer.
- B. The engineer was completed by the report.
- C. The report had completed the engineer.
- D. The report was completed by the engineer.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) The report is completed by the engineer.

→ STRIKE — The report is completed by the engineer.: it does not follow from the stated system, sign convention, or requested check.

B) The engineer was completed by the report.

→ STRIKE — The engineer was completed by the report.: it does not follow from the stated system, sign convention, or requested check.

C) The report had completed the engineer.

→ STRIKE — The report had completed the engineer.: it does not follow from the stated system, sign convention, or requested check. REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

D) The report was completed by the engineer.

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

Survivors after this rule: D only → keyed D.

Q25 of 34 · Non-core ST-GEC · data/noncore/st/nc-st-gec-01.js#Q49 · Key A · CORRECT

Subject: General English and Computers

Stem: In a sentence-correction item during life-cycle assessment, the sentence 'the engineer completed the report' is converted to passive voice. Which statement is correct?

- A. The report was completed by the engineer.
- B. The report is completed by the engineer.
- C. The engineer was completed by the report.
- D. The report had completed the engineer.

Elimination write-up

Applicability grade: CORRECT

Why this grade: Asked operation can be abandoned by a neighbouring option.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

- A) The report was completed by the engineer.
 - KEEP — The requested quantity follows from the data and condition stated in the stem.
- B) The report is completed by the engineer.
 - STRIKE — The report is completed by the engineer.: it does not follow from the stated system, sign convention, or requested check.
- C) The engineer was completed by the report.
 - STRIKE — The engineer was completed by the report.: it does not follow from the stated system, sign convention, or requested check.
- D) The report had completed the engineer.
 - STRIKE — The report had completed the engineer.: it does not follow from the stated system, sign convention, or requested check. REMEMBER: • Identify the physical quantity before choosing a formula. • For GEC, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: A only → keyed A.

Q26 of 34 · Civil FLT-01 · data/civil/ce-flt01.js#Q77 · Key B · WEAK

Subject: Quantitative Aptitude

Stem: A contractor's quoted cost for a bay package is ₹12 lakh. He allows 10% discount on the quote and still makes 20% profit on cost. His cost price is closest to:

- A. ₹8.0 lakh
- B. ₹9.0 lakh
- C. ₹10.0 lakh
- D. ₹11.0 lakh

Elimination write-up

Applicability grade: WEAK

Why this grade: Non-core item; operation-abandon trap not explicit.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) ₹8.0 lakh

→ STRIKE — ₹8.0 lakh: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹9.0 lakh").

B) ₹9.0 lakh

→ KEEP — ₹9.0 lakh This uniquely selects "₹9.0 lakh". See per-option mechanisms under TRAP ANALYSIS.

C) ₹10.0 lakh

→ STRIKE — ₹10.0 lakh: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹9.0 lakh").

D) ₹11.0 lakh

→ STRIKE — ₹11.0 lakh: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹9.0 lakh").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: ₹9.0 lakh Final keyed result: ₹9.0 lakh.

Note: mapping is WEAK — teach cautiously; prefer a stronger rule if another fits better.

Q27 of 34 · Civil FLT-02 · data/civil/ce-flt02.js#Q73 · Key B · WEAK

Subject: Quantitative Aptitude

Stem: A price rises 20%, falls 10%, then attracts 5% tax. Relative to the original pre-tax price, the final amount changes by:

- A. 8% increase
- B. 13.4% increase
- C. 15% increase
- D. 2.6% decrease

Elimination write-up

Applicability grade: WEAK

Why this grade: Non-core item; operation-abandon trap not explicit.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 8% increase

→ STRIKE — 8% increase: Picks '8% increase' by mis-applying the stem data — recheck units and the asked quantity.

B) 13.4% increase

→ KEEP — N/A — conceptual / judgement (no arithmetic key).

C) 15% increase

→ STRIKE — 15% increase: Picks '15% increase' by mis-applying the stem data — recheck units and the asked quantity.

D) 2.6% decrease

→ STRIKE — 2.6% decrease: Picks '2.6% decrease' by mis-applying the stem data — recheck units and the asked quantity.

Survivors after this rule: B only → keyed B.

Note: mapping is WEAK — teach cautiously; prefer a stronger rule if another fits better.

→ STRIKE — ₹11.0 lakh: Choosing this option usually means applying the wrong basis/formula for what the stem asks (keyed result is "₹9.0 lakh").

Survivors after this rule: B only → keyed B.

=== SCRATCH CHECK (verification only — not the elimination) ===

CORRECT: ₹9.0 lakh Final keyed result: ₹9.0 lakh.

Note: mapping is WEAK — teach cautiously; prefer a stronger rule if another fits better.

Q29 of 34 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q1 · Key A · WEAK

Subject: Aptitude and Reasoning

Stem: In a work-rate planning problem during preliminary sizing, a stores ledger records 450 cable drums. The value of 20% of this quantity is:

- A. 90
- B. 80
- C. 100
- D. 45

Elimination write-up

Applicability grade: WEAK

Why this grade: Non-core item; operation-abandon trap not explicit.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 90

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

B) 80

→ STRIKE — 80: it does not follow from the stated system, sign convention, or requested check.

C) 100

→ STRIKE — 100: it does not follow from the stated system, sign convention, or requested check.

D) 45

→ STRIKE — 45: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: A only → keyed A.

Note: mapping is WEAK — teach cautiously; prefer a stronger rule if another fits better.

Q30 of 34 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q19 · Key C · WEAK

Subject: Aptitude and Reasoning

Stem: In a time-and-distance problem during proof loading, during a relay-setting review, A candidate allocates 20% of a quantity of 450 units. Which statement is correct?

- A. 45
- B. 80
- C. 90
- D. 100

Elimination write-up

Applicability grade: WEAK

Why this grade: Non-core item; operation-abandon trap not explicit.

=== ELIMINATION (Rule 9: Non-core: option that abandons the asked operation) ===

Trigger check: Quant/English/reasoning where one option changes the asked operation.

Option walk:

A) 45

→ STRIKE — 45: it does not follow from the stated system, sign convention, or requested check.

B) 80

→ STRIKE — 80: it does not follow from the stated system, sign convention, or requested check.

C) 90

→ KEEP — The requested quantity follows from the data and condition stated in the stem.

D) 100

→ STRIKE — 100: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Survivors after this rule: C only → keyed C.

Note: mapping is WEAK — teach cautiously; prefer a stronger rule if another fits better.
