

Elimination Rules — Non-core only

Each rule is explained first. Then every matching question is solved one-by-one using only that elimination rule.

Rules in this stream

# in stream	Playbook #	Title	Q count (this stream)
1	16	Non-core: option that abandons the asked operation	40

Non-core Rule 1 (Playbook #16) — Non-core: option that abandons the asked operation

Stream section: Non-core · **Questions in this section:** 40 (every matching evidence item is solved below — none skipped)

What this rule means

Non-core items often include one option that solves a different operation (CI instead of SI, active instead of passive, wrong percentage base).

When to use

Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Application steps

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

Memory cue: Match the asked operation exactly (% , SI, tense, code rule)

Core elimination move

Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Below: **all 40 questions** for this rule in the Non-core stream, one after another. Each solution uses only this elimination rule.

Q1 of 40 · Civil FLT-01 · data/civil/ce-flt01.js#Q72 · Key B

Subject: Quantitative Aptitude

Stem: A transmission-estimate package rises from ₹8.0 crore to ₹9.2 crore after a design revision. The percentage increase is:

- A. 12%
- B. 15%
- C. 18%
- D. 20%

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: 15% This uniquely selects "15%". See per-option mechanisms under TRAP ANALYSIS.

Scratch check that confirms the survivor: CORRECT: 15% Final keyed result: 15%.

Option-by-option elimination:

A) 12%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

B) 15%

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) 18%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

D) 20%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q2 of 40 · Civil FLT-01 · data/civil/ce-flt01.js#Q76 · Key B

Subject: Quantitative Aptitude

Stem: A mobilisation advance of ₹5,00,000 is charged simple interest at 12% per annum for 8 months. The interest amount is:

- A. ₹30,000
- B. ₹40,000
- C. ₹48,000
- D. ₹50,000

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: ₹40,000 This uniquely selects "₹40,000". See per-option mechanisms under TRAP ANALYSIS.

Scratch check that confirms the survivor: CORRECT: ₹40,000 Final keyed result: ₹40,000.

Option-by-option elimination:

A) ₹30,000

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

B) ₹40,000

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) ₹48,000

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

D) ₹50,000

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q3 of 40 · Civil FLT-01 · data/civil/ce-flt01.js#Q77 · Key B

Subject: Quantitative Aptitude

Stem: A contractor's quoted cost for a bay package is ₹12 lakh. He allows 10% discount on the quote and still makes 20% profit on cost. His cost price is closest to:

- A. ₹8.0 lakh
- B. ₹9.0 lakh
- C. ₹10.0 lakh
- D. ₹11.0 lakh

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: ₹9.0 lakh This uniquely selects "₹9.0 lakh". See per-option mechanisms under TRAP ANALYSIS.

Scratch check that confirms the survivor: CORRECT: ₹9.0 lakh Final keyed result: ₹9.0 lakh.

Option-by-option elimination:

A) ₹8.0 lakh

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

B) ₹9.0 lakh

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) ₹10.0 lakh

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

D) ₹11.0 lakh

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q4 of 40 · Civil FLT-01 · data/civil/ce-flt01.js#Q86 · Key C

Subject: Reasoning & General Intelligence

Stem: In a certain code used in a mock dispatch sheet, each letter is shifted +1, -1, +1, -1... alternately. The code for BAY is:

- A. CBX
- B. ABZ
- C. CBZ
- D. AAX

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: CBZ This uniquely selects "CBZ". See per-option mechanisms under TRAP ANALYSIS.

Option-by-option elimination:

A) CBX

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

B) ABZ

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

C) CBZ

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

D) AAX

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only C remains → keyed answer C.

Q5 of 40 · Civil FLT-01 · data/civil/ce-flt01.js#Q92 · Key A

Subject: English Language & Comprehension

Stem: Choose the correct passive form of: "The engineer verified the relay settings."

- A. The relay settings were verified by the engineer.
- B. The relay settings verified the engineer.
- C. The relay settings are verify by the engineer.
- D. The engineer was verified by the relay settings.

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The relay settings were verified by the engineer.

Option-by-option elimination:

A) The relay settings were verified by the engineer.

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

B) The relay settings verified the engineer.

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

C) The relay settings are verify by the engineer.

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

D) The engineer was verified by the relay settings.

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only A remains → keyed answer A.

Q6 of 40 · Civil FLT-02 · data/civil/ce-flt02.js#Q73 · Key B

Subject: Quantitative Aptitude

Stem: A price rises 20%, falls 10%, then attracts 5% tax. Relative to the original pre-tax price, the final amount changes by:

- A. 8% increase
- B. 13.4% increase
- C. 15% increase
- D. 2.6% decrease

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: N/A — conceptual / judgement (no arithmetic key).

Option-by-option elimination:

A) 8% increase

→ STRIKE — 8% increase: Picks '8% increase' by mis-applying the stem data — recheck units and the asked quantity.

B) 13.4% increase

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) 15% increase

→ STRIKE — 15% increase: Picks '15% increase' by mis-applying the stem data — recheck units and the asked quantity.

D) 2.6% decrease

→ STRIKE — 2.6% decrease: Picks '2.6% decrease' by mis-applying the stem data — recheck units and the asked quantity.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q7 of 40 · Civil FLT-02 · data/civil/ce-flt02.js#Q78 · Key B

Subject: Quantitative Aptitude

Stem: A square's diagonal is increased by 10% while shape remains square. By what percentage does area increase?

- A. 20%
- B. 21%
- C. 10%
- D. 22%

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: N/A — conceptual / judgement (no arithmetic key).

Option-by-option elimination:

A) 20%

→ STRIKE — 20%: Picks '10%' by mis-applying the stem data — recheck units and the asked quantity.

B) 21%

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) 10%

→ STRIKE — 10%: Picks '20%' by mis-applying the stem data — recheck units and the asked quantity.

D) 22%

→ STRIKE — 22%: Picks '22%' by mis-applying the stem data — recheck units and the asked quantity.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q8 of 40 · Civil FLT-02 · data/civil/ce-flt02.js#Q88 · Key C

Subject: Reasoning & General Intelligence

Stem: In a code, each letter is shifted alternately +2, -1, +2, -1. How is GRID coded?

- A. HQKC
- B. ITKF
- C. IQKC
- D. IQUC

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: N/A — conceptual / judgement (no arithmetic key).

Option-by-option elimination:

A) HQKC

→ STRIKE — HQKC: Picks 'IQUC' by mis-applying the stem data — recheck units and the asked quantity.

B) ITKF

→ STRIKE — ITKF: Picks 'HQKC' by mis-applying the stem data — recheck units and the asked quantity.

C) IQKC

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

D) IQUC

→ STRIKE — IQUC: Picks 'ITKF' by mis-applying the stem data — recheck units and the asked quantity.

Conclusion: after Rule 16 elimination, only C remains → keyed answer C.

Q9 of 40 · Electrical FLT-01 · data/electrical/ee-flt01.js#Q72 · Key B

Subject: Quantitative Aptitude

Stem: A transmission-estimate package rises from ₹8.0 crore to ₹9.2 crore after a design revision. The percentage increase is:

- A. 12%
- B. 15%
- C. 18%
- D. 20%

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: 15% This uniquely selects "15%". See per-option mechanisms under TRAP ANALYSIS.

Scratch check that confirms the survivor: CORRECT: 15% Final keyed result: 15%.

Option-by-option elimination:

A) 12%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

B) 15%

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) 18%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

D) 20%

→ STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Q10 of 40 · Electrical FLT-01 · data/electrical/ee-flt01.js#Q76 · Key B

- A. The relay settings were verified by the engineer.
- B. The relay settings verified the engineer.
- C. The relay settings are verify by the engineer.
- D. The engineer was verified by the relay settings.

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The relay settings were verified by the engineer.

Option-by-option elimination:

- A) The relay settings were verified by the engineer.
 - KEEP — Survives this rule — matches the asked quantity and the rule's correct path.
- B) The relay settings verified the engineer.
 - STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.
- C) The relay settings are verify by the engineer.
 - STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.
- D) The engineer was verified by the relay settings.
 - STRIKE — violates Rule 16 (Non-core: option that abandons the asked operation): classic distractor in this trap family / does not match the rule's correct path.

Conclusion: after Rule 16 elimination, only A remains → keyed answer A.

Q14 of 40 · Electrical FLT-02 · data/electrical/ee-flt02.js#Q77 · Key D

Subject: Quantitative Aptitude

Stem: Contractor buys equipment for Rs 240000 and sells for Rs 276000. Profit percent on cost is:

- A. 20%
- B. 16%
- C. 12%
- D. 15%

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: $36000/240000=15\%$.

Scratch check that confirms the survivor: 15%. Final keyed result: 15%.

Option-by-option elimination:

A) 20%

→ STRIKE — 20%: On SP base different.

B) 16%

→ STRIKE — 16%: Uses 276/240 wrong.

C) 12%

→ STRIKE — 12%: Subtract only.

D) 15%

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

Conclusion: after Rule 16 elimination, only D remains → keyed answer D.

Q15 of 40 · Electrical FLT-02 · data/electrical/ee-flt02.js#Q92 · Key C

Subject: English Language & Comprehension

Stem: Choose passive: The technician calibrated the protection relay.:

- A. The protection relay is calibrate by the technician.
- B. The technician was calibrated by the protection relay.
- C. The protection relay was calibrated by the technician.
- D. The protection relay calibrates the technician.

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: Object becomes subject; past passive.

Option-by-option elimination:

- A) The protection relay is calibrate by the technician.
→ STRIKE — The protection relay is calibrate by the technician.: Active reversed wrong.
- B) The technician was calibrated by the protection relay.
→ STRIKE — The technician was calibrated by the protection relay.: Wrong verb form.
- C) The protection relay was calibrated by the technician.
→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.
- D) The protection relay calibrates the technician.
→ STRIKE — The protection relay calibrates the technician.: Absurd agent.

Conclusion: after Rule 16 elimination, only C remains → keyed answer C.

Q16 of 40 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q1 · Key A

Subject: Aptitude and Reasoning

Stem: In a work-rate planning problem during preliminary sizing, a stores ledger records 450 cable drums. The value of 20% of this quantity is:

- A. 90
- B. 80
- C. 100
- D. 45

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The requested quantity follows from the data and condition stated in the stem.

Option-by-option elimination:

A) 90

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

B) 80

→ STRIKE — 80: it does not follow from the stated system, sign convention, or requested check.

C) 100

→ STRIKE — 100: it does not follow from the stated system, sign convention, or requested check.

D) 45

→ STRIKE — 45: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only A remains → keyed answer A.

Q17 of 40 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q17 · Key A

Subject: Aptitude and Reasoning

Stem: In a coding-decoding exercise during shutdown planning, a person faces north, turns right, then right again, and finally turns left. Which statement is correct?

- A. East
- B. North
- C. South
- D. West

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The requested quantity follows from the data and condition stated in the stem.

Option-by-option elimination:

A) East

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

B) North

→ STRIKE — North: it does not follow from the stated system, sign convention, or requested check.

C) South

→ STRIKE — South: it does not follow from the stated system, sign convention, or requested check.

D) West

→ STRIKE — West: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only A remains → keyed answer A.

Subject: Aptitude and Reasoning

Stem: In a time-and-distance problem during proof loading, during a relay-setting review, A candidate allocates 20% of a quantity of 450 units. Which statement is correct?

- A. 45
- B. 80
- C. 90
- D. 100

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The requested quantity follows from the data and condition stated in the stem.

Option-by-option elimination:

A) 45

→ STRIKE — 45: it does not follow from the stated system, sign convention, or requested check.

B) 80

→ STRIKE — 80: it does not follow from the stated system, sign convention, or requested check.

C) 90

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

D) 100

→ STRIKE — 100: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only C remains → keyed answer C.

D) 100

→ STRIKE — 100: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only A remains → keyed answer A.

Q33 of 40 · Non-core ST-AR · data/noncore/st/nc-st-ar-01.js#Q50 · Key B

Subject: Aptitude and Reasoning

Stem: In a data-interpretation question during residual-risk review, a deposit of ₹10,000 earns simple interest at 10% per annum for two years. Which statement is correct?

- A. ₹1,000
- B. ₹2,000
- C. ₹2,100
- D. ₹2,200

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The requested quantity follows from the data and condition stated in the stem.

Option-by-option elimination:

A) ₹1,000

→ STRIKE — ₹1,000: it does not follow from the stated system, sign convention, or requested check.

B) ₹2,000

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

C) ₹2,100

→ STRIKE — ₹2,100: it does not follow from the stated system, sign convention, or requested check.

D) ₹2,200

→ STRIKE — ₹2,200: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only B remains → keyed answer B.

Subject: Aptitude and Reasoning

Stem: In a coding-decoding exercise during laboratory validation, cP 800 SP 1000 profit%:

- A. 12.5%
- B. 80%
- C. 25%
- D. 20%

Elimination solution (this rule only)

Elimination using Rule 16 — Non-core: option that abandons the asked operation

When this rule fires: Quant / reasoning / English — one option changes the operation (% , SI, tense, code).

Core move: Re-state the exact ask (20% of 450; SI for 2 years; passive of present perfect). Eliminate options that solve a different operation (CI instead of SI, active instead of passive).

Apply the rule in order:

1. Re-state the exact ask in one short sentence.
2. Strike any option that changes the operation.

How the rule makes the key correct: The requested quantity follows from the data and condition stated in the stem.

Option-by-option elimination:

A) 12.5%

→ STRIKE — 12.5%: it does not follow from the stated system, sign convention, or requested check.

B) 80%

→ STRIKE — 80%: it does not follow from the stated system, sign convention, or requested check.

C) 25%

→ KEEP — Survives this rule — matches the asked quantity and the rule's correct path.

D) 20%

→ STRIKE — 20%: it does not follow from the stated system, sign convention, or requested check. REMEMBER: •

Identify the physical quantity before choosing a formula. • For AR, check units, reference direction, and the stated operating condition. • Do not import a neighbouring-code provision or assumption that is absent from the stem.

Conclusion: after Rule 16 elimination, only C remains → keyed answer C.
